The primary reason for the allowance of the claims is a surface pressure applying device having the combination of at least two plate bricks with a pair of spring holders with surface pressure releasing plates with projections with a surface releasing bar with a wedge portion so that the arrangement centers align with lifting or depressing the surface pressure releasing plates to release or apply pressure and the spring holders having hooks for engaging the clamp.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Keller, Taira, Inubushi, Tofuku, and Tinnes disclose surface releasing devices. Bates, Fricker, Ericson, and Kernion disclose slide valves. Terao and Aliprandi disclose brick plates in a sliding valve.
